Plastic Cards

As the #1 plastic card manufacturer in the world, we offer customized secure and non-secure card solutions that fit your specific needs.

We're Visa, MasterCard, American Express, Discover, and Diner's Club certified, and an approved ID supplier for governments across North and South America, Oceania, North and Central Africa, and the Middle East.

World leaders you trust.
Card services you need.

Our global capabilities ensure that our ABnote support services go everywhere your cards and cardholders go.

Whatever your specific requirement, ABnote gives you a trusted partner with the most diverse array of resources to provide any card solution you need.

Identity Solutions

ABnote produces tens of millions of secure, counterfeit-resistant identity products every year. And, unlike many of our competitors, we can provide you with as much or as little of the transactional spectrum as you need, ranging from card-only or issuance-only options, to the full-service operation of your Motor Vehicle Department, your Passport issuance authority, or your corporate credentialing function.

We offer a host of ICAO compliant designs, biometrics, and security features, all customized to serve your particular needs.

Secure Document Printing

For more than two centuries, ABnote has provided secure documents to clients around the globe. Starting with Continental Bank Notes for the first U.S. Colonies, we have grown to serve every facet in the secure document industry. We have printed billions of check forms and stock certificates, gift certificates and Travelers Checks for over 150 companies, passports for many nations, auto titles for more than forty states, and vital records for a wide range of governmental customers.

We have the resources, expertise, and experience needed to protect your documents from counterfeiting and

misappropriation. Our industry-leading procedures and processes, performed at our secure print facilities, allow us to offer quality and security that are unmatched.

ABnote uses all of the latest counterfeit-resistant technologies, from OVD and RFID, to nanotechnology and ultra-covert markers, as well as the tried and true solutions such as watermark paper, special inks, and intaglio printing. We incorporate both hidden and overt features, security background designs, complex colors, and microtext lines, all to ensure the integrity and authenticity of your documents.

Secure Distribution and Fulfillment

To understand the scope of our secure distribution and fulfillment capabilities, one has only to look at our groundbreaking Stamps on Consignment contract with the United States Postal Service. We inventory, secure, ship, bill, and collect for nearly \$100,000,000 worth of U.S. postage stamps every month, for over forty thousand separate retail locations.

The fact that the USPS has entrusted us with this level of responsibility is a clear reflection of our core competency in security, logistics, and reconciliation.

Whether it's stamps, gift certificates, gift cards, scrip, or any product that requires accountability and loss protection, ABnote can implement a customized and surprisingly affordable distribution program that meets your specific needs.

Near Field (NFC) and Contactless Applications

At ABnote, we offer the widest range of NFC and contactless solutions anywhere.

For us, enabling contactless and NFC payment is not the goal, but just the beginning. We offer a wide range of form factors and securely host and manage (or at your option, build and transfer to you in-house) a growing line of applications that have already expanded the industry's vision of what an NFC ecosystem can look like!

Traditional form factors:

- » ICAO compliant e-passports
- » Contactless Secure Identity Cards

- » Music and Video Downloads
- » Identity Management
- » Travel & Entertainment

Banking Solutions

ABnote has been serving and securing the financial world for well over 200 years. Whether it's secure payment cards, personal business or cashier checks, electronic variable data printing, Travelers Checks, or PIN mailers, ABnote can provide it all from secure Visa, MasterCard, American Express, and Discover-certified facilities.

We also print your card carriers, mailers, and collateral material and can distribute them on your behalf with full accountability. ABnote can also help banks and bureaus transition, often at no additional cost, into the complex worlds of EMV-II and NFC.

Defining Trust
Since 1795.
